Beginner

### CAREER OBJECTIVE

To obtain an entry-level position in IT (Support Technician, Junior Developer, Network Assistant, or Seasonal Technical Role) in an international company where I can apply my technical skills, improve professionally, and contribute to real-world IT operations and system efficiency.

## PROJECTS

---

### Employee Management System

*(PHP, MySQL, JavaScript)*

- Built a web application to manage employees and internal data
- Implemented authentication and role-based access
- Designed relational database structure in MySQL
- Created responsive UI with HTML/CSS/JavaScript

### Inventory Management System

*(PHP, MySQL)*

- Developed system to track stock and product data
- Implemented CRUD operations for database management
- Tested application using local server (XAMPP)

### Personal Portfolio Website

*(HTML, CSS, JavaScript)*

- Designed responsive personal portfolio website
- Showcased projects and technical skills
- Optimized layout for mobile and desktop devices

### Network Scanner

*(Python)*

- Developed tool to detect active devices in a network
- Used socket programming for port scanning
- Analyzed network traffic using Wireshark

### Password Manager

*(Python, SQLite)*

- Built local application for secure password storage
- Implemented structured database storage
- Created simple interface for usability

## CYBERSECURITY & NETWORKING TRAINING

---

### Linux & networking basics

*TryHackMe*

### Introductory security labs

*Hack The Box*

### Routing & switching fundamentals

*Cisco Networking Academy*
